

WELCOME TO MANUEL ANTONIO!

Just a fifteen minute ride from Hacienda Matapalo

Manuel Antonio Park is the most visited park in Costa Rica due to its overwhelming beauty.

The Manuel Antonio National Park is a small biological peninsula found within an area devoted to different productive activities, such as agriculture, cattle and high tourism development. It is one of the country's most scenic and beautiful national parks. The mean annual temperature is 27°C, with a minimum temperature of 20°C.

Our park habitat consists of primary and secondary forest, the most characteristic species of flora in the primary forest are guácimo colorado (*Luehea seemannii*), pilón (*Hieronyma alchomeoides*), cedro maría (*Calophyllum longifolium*), guapinol blanco (*Hymenaea courbaril*), surá (*Terminalia oblonga*), guapinol negro or stinkingtoe (*Cynometra hemitomophyla*), lechoso (cow tree/*Brosimum utile*), cenízaro (*Pithecelobium saman*) and ceiba (silk cotton tree).

Of its most important fauna we find the raccoon, coatamundi, agouti, two-toed sloth, the white-faced and squirrel monkey.

You can also enjoy the beauty of beaches like Espadilla Sur, Puerto Escondido and Manuel Antonio.

Manuel Antonio offers the uniquely breathtaking fusion of scenic mountain beauty and an active lifestyle. From championship surf tournaments, hiking, rafting/kayaking, canopying, bird watching or sport fishing, Quepos and Manuel Antonio offers something for everyone.
